

Reading , Writing, Communication & Mathematics

On the 26th November some of year 10s received a visit from Zubair Moti, an employee from Jaguar Land Rover (JLR), and Vanessa Breward from LEBC. A talk was given by Zubair in the field of Science, Technology, Engineering and Maths (STEM) with the aim of inspiring the next generation of STEM professionals. Zubair demonstrated how mechanical and software engineering are used in the motor production industry by JLR and his role in this successful company.

Students were challenged to find a career that does not utilise any of the STEM subjects and this proved a fruitless search as almost all sectors of employment encompass these.

This was an inspirational experience and gave our students a real world example and insight of where a STEM career could lead. It reinforced to our students that what is covered in the curriculum at Groby Community College also relates to industry and professional careers. Zubair ended his session by giving each of our year 10s at the talk with a JLR goodie bag which added to the students enthusiasm.

Many thanks to Zubair Moti from JLR and Vanessa Breward from LEBC for visiting Groby Community College and inspiring our students.

"The session inspired me to be more open minded about the career I may go into. I'm thinking of taking maths at A Level now" - Karishma.

"I didn't realise that most jobs have some sort of STEM element in them. I found this interesting" - Shannon.
